A state-of-the-art floating laboratory, Elettra became the site of his research breakthrough in the early 1920s on shortwave, or high frequency, radio transmission. This finally made long-distance wireless commercially competitive with cable telegraphy and greatly expanded the communications capacity of the earth's electromagnetic spectrum.

Guglielmo Marconi - Engineering and Technology History Wiki

In 1894 Marconi retreated to a top floor laboratory of his family's Villa Grifone near Bologna, Italy, and at the age of twenty began his experiments in earnest. At first, Marconi used homemade equipment, testing and repeatedly modifying it, each time stretching to greater limits the distance that signals could be received from a transmitter.

Marconi and the South Wellfleet Wireless - Cape Cod ...

Marconi lies in the ethnographic territory of the Coastal Miwok. In the latter part of the 18th century, this tribe occupied most of Marin and part of Sonoma county. Their population was estimated, by early explorers, to be between 1,500 to 2,000 members.
