### **Book Review: Seeds of Change by Henry Hobhouse | Mboten**

I am joining the Six on Saturday crew today featuring seeds. I started planting tomato seeds this week for my fall garden and noticed many plants producing seed in the garden. As usual, the tropical plants behave differently and the seeds start early, perhaps to catch the end of the rainy season and get a...

## **Seeds of Change**

Seeds of Change is a collection of succinct historical reviews that focus on five plants – quinine, sugar cane, tea, cotton, and the potato – that have had, as Hobhouse argues, a transformative relationship with human kind as we have progressed to this point in time.

## **High School Science title: “Seeds of Change: Five Plants ...**

Plant seeds  $\frac{1}{2}$  to 1 inch deep, 2-3 inches apart, 18-30 inches between rows. Water well just once at planting time to avoid seed rot. After the seedlings emerge (6-12 days) keep moderately moist, allowing the soil to dry out a bit between waterings.

MicroRNAs (miRNAs) regulate various biological processes in plants. Considerable data are available on miRNAs involved in the development of rice, maize and barley. In contrast, little is known about miRNAs and their functions in the development of wheat. In this study, five small RNA (sRNA) libraries from wheat seedlings, flag leaves, and developing seeds were developed and sequenced to ...
